

Dark Web Evaluation & Monitoring

Identify if your business's sensitive information is being exposed or traded on the Dark Web.

What Is It and Why Do You Need It?

Dark Web monitoring and evaluation, powered by Breach Secure Now, involve scanning hidden parts of the internet to detect if confidential information is being shared or sold illegally. This crucial service provides early alerts to potential security breaches, helping to protect your business' reputation, prevent financial loss, and maintain customer trust in an increasingly digitalized world.

Benefits

- **Proactive Threat Intelligence:** Proactively identifies and alerts you to potential threats and compromised data, enabling swift action to mitigate risks
- **Peace of Mind:** Offers reassurance that your organization's sensitive data is being continuously monitored on the Dark Web
- **Reduced risk:** Provides oversight of your organization's digital footprint on the Dark Web, significantly reducing the risk of data breaches and cyber attacks
- **Access to Experts:** Navigating the complexities of the Dark Web requires expertise and resources beyond the reach of most businesses

How It Works

No-Cost Dark Web Evaluation: Uncover Hidden Risks Our free, one-time Dark Web Evaluation combs through the digital underworld to identify if your business's sensitive information is being exposed or traded. We provide you with a comprehensive report detailing our findings.

Ongoing Dark Web Monitoring: Constant Vigilance Cyber threats are dynamic, making continuous monitoring essential. TPx's Dark Web Monitoring service operates around the clock, scanning thousands of websites for indications of your data being compromised. Receive alerts when your data is found on the Dark Web, so you can take swift action in securing any accounts that may have been exposed. This immediate response provides ongoing protection for your business.

Why TPx?

With our comprehensive approach to cybersecurity, a team of seasoned experts, and market-leading technology, you gain a formidable ally in protecting your organization against ever-evolving cyber threats, ensuring peace of mind and robust defense in the digital landscape. Discover if your company's information is being exposed or traded on the Dark Web at no cost with TPx. If your organization wants to set up continuous monitoring, we've got you covered at a fraction of the cost of having an in-house resource.

Companies that utilized Dark Web monitoring and threat intelligence **reduced the cost of a data breach by an average of \$1 million** compared to those that did not use these services.
