

# Managed Firewalls

## Enterprise-Grade Firewall Protection Without the Complexity

### What Is It and Why Do You Need It?

A firewall is your network's first line of defense, blocking unauthorized access and filtering harmful traffic. But just having a firewall isn't enough—it must be expertly configured, continuously updated, and constantly monitored to stay effective. TPx Managed Firewall takes that burden off your plate. We pair **industry-leading firewall technology** with 24/7 oversight from certified security analysts to give you enterprise-grade protection without the in-house complexity. **Even better, TPx adds an extra layer of protection by detecting and responding to threats early – shutting them down before they disrupt your operations.**

### Key Benefits

Benefit	What It Means for You
Stronger Data Protection	Prevent breaches, ransomware, and malware from compromising your sensitive business data.
Cut Downtime	Keep your business running by blocking threats that could disrupt operations.
Compliance-Ready Security	Meet industry standards like HIPAA and PCI-DSS with built-in auditing and controls.
Greater Visibility & Control	See who's on your network and adjust policies easily to stay secure and productive.
24/7 Monitoring & Support	Experts watch over your firewall day and night so you don't have to.
Scales with Growth	Your protection scales with you – no rip-and-replace needed as you grow.
Reduced IT Burden	Offload updates, troubleshooting, and configurations to our security team.
Fully Managed or Co-Managed Options	Stay in control or hand it off – your call, we support both.
Customized Advisory Services	Tailored security consulting

# How It Works

## Step 1

### Expert-Led Deployment

TPx begins with a guided onboarding process led by certified engineers. We design and pre-configure your firewall according to TPx best practices and your unique requirements, whether you opt for onsite or remote installation. Every implementation includes project management, documentation (Runbook), and secure shipping of equipment.

## Step 2

### 24/7 Monitoring, Management & Protection

Once deployed, your firewall is continuously monitored by TPx's security team using a blend of AI-driven analytics and expert oversight. We track performance, traffic patterns, and potential security incidents in real time—opening cases automatically when alerts are triggered. Our team handles firmware updates, configuration changes, and user access support to keep your network secure and optimized without burdening your internal resources.

## Step 3

### Ongoing Optimization & Reporting

Beyond day-to-day management, TPx provides proactive support including log retention, regular reporting, lifecycle and compliance tracking, and consultative guidance. You get full visibility into network health, security events, bandwidth usage, VPN activity, and more. As your business evolves, we ensure your firewall strategy evolves too—adding services like high availability, MDR, or SD-WAN as needed.

## Powered by Industry Leaders

TPx works with top firewall vendors to deliver next-generation protection that's secure, scalable, and proven. These partnerships combine best-in-class technology with TPx's 24/7 management for complete peace of mind.

# End-to-End Network Protection and Performance

Firewalls are just one part of a secure, reliable network. Many organizations also rely on switches and wireless access points to keep users and devices securely connected across every location. TPx delivers and manages all of these – from firewalls to enterprise-grade switching and Wi-Fi solutions – as part of our fully managed network services. That means one trusted partner for end-to-end performance, security, and support across your entire IT environment.

## Why TPx

When it comes to cybersecurity, who you trust to manage your defenses matters. TPx combines industry-leading technology with a proven service model, so you're not just getting a firewall—you're getting a fully managed security solution tailored to your business.

### Expertise That's Hard to Find:

Our certified security analysts manage thousands of firewalls and are backed by third-party audited processes that support HIPAA, PCI-DSS, and other compliance needs.

### Security Add-on

Go beyond prevention. Our Secure level of service adds real-time threat detection, analysis, and rapid containment.

...

### All-In-One Simplicity:

Our certified security analysts manage thousands of firewalls and are backed by third-party audited processes that support HIPAA, PCI-DSS, and other compliance needs.

### Flexibility to Fit Your Team:

Choose from fully managed or co-managed options—whether you need a complete security partner or support to boost your internal team.

...

### Rapid, Reliable Deployment:

Get up and running quickly with pre-configured devices, remote or onsite installation, and expert project management.

...

### More Than Just Firewalls:

We can integrate firewalls with broader solutions like SD-WAN, endpoint protection, and managed networks – scaling with you as your needs grow.

...

With TPx, you get enterprise-grade protection without enterprise overhead—delivered by a team that knows your business and has your back.

## Customer Perspective

“You have to have good relationships with firms like TPx that can provide comprehensive subject matter expertise and assistance with new service implementation, ongoing technical assistance, troubleshooting issues and understanding new technologies.

Having that kind of partnership is ideal so there can be a robust response when issues arise. That’s part of what we appreciate about TPx; the response has been very rapid.”
